ÆLEMENT FUSION

INTRODUCING THE NEXT LEVEL OF CONNECTIVITY WITH YOUR GUEST

Ælement Fusion is an electronic lock with a sleek reader accentuated by an interactive light ring that illuminates when access credentials are presented, providing a minimalistic design that blends with any hotel décor.

AN EVOLUTION IN HOTEL LOCK ENGINEERING BY SALTO

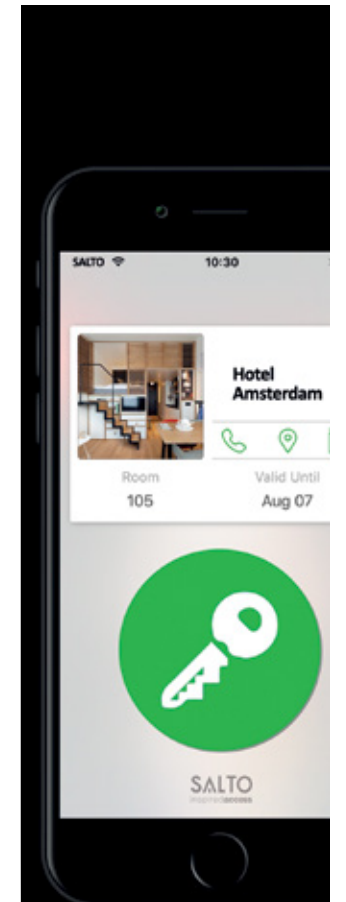

INVISIBLE INNOVATION

Electronic circuit board and battery pack.

THE CHOICE IS YOURS

Choose the reader finish & handle designs that best fit your hotel style.

MOBILE TECHNOLOGY

Wireless & mobile embedded onboard.

INVISIBLE INNOVATION

ELECTRONIC CIRCUIT BOARD AND BATTERY PACK.

Ælement Fusion eliminates lock hardware on the door by encasing all electronic components inside the door itself, making security virtually invisible.

Enclosing the lock hardware inside the door - instead of just above the handle, as is customary – gives the door a stylish and sleek appearance. Security is also further enhanced by placing all lock components within the door.

Despite the “invisible innovation” and the absence of traditional door lock hardware, the Ælement Fusion performs just as any SALTO electronic lock. It combines SALTO’s stand-alone, battery-powered electronic lock technology and SALTO Virtual Network (SVN) data-on-card, advanced wireless technology with online, real-time monitoring and mobile access technology with NFC & BLE capabilities.

DESIGN

Clean, minimalistic new round design that blends with any hotel décor.

SALTO SPACE

THE CHOICE IS YOURS

CHOOSE THE READER FINISH & HANDLE DESIGNS THAT BEST FIT YOUR HOTEL STYLE.

The Ælement Fusion's small, customizable light ring reader offers a discreet electronic lock for hotels looking to deploy electronic access control with a stylish, yet technologically-advanced solution. SALTO offers a variety of door handles and finishes to complement any door style.

Colombo Design by SALTO:

Stylish design is part of SALTO's DNA, so when it comes to selecting handles for your doors, we believe you should be able to choose from the very best available.

With the objective of always offering more to its customers, SALTO has teamed up with one of Italy's leading handle designers, Colombo Design.

Colombo will make its best designs available for customers to choose from; a high quality selection suitable for both SALTO XS4 and Ælement electronic lock ranges, and compatible with both ANSI and DIN EU door standards.

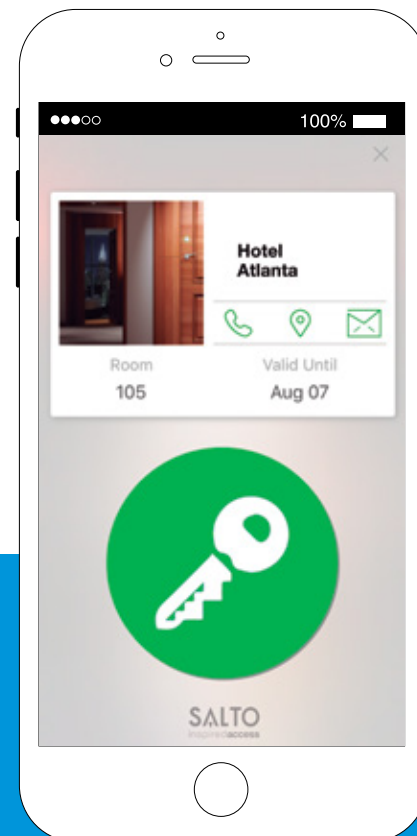

MOBILE TECHNOLOGY

WIRELESS & MOBILE EMBEDDED ON BOARD.

Ælement Fusion is equipped with RFID and NFC with improved reading distance, and also adds BLE. This additional feature allows guests and staff to use their smartphone as a key.

Security, efficiency and design are all essential aspects of access control in the highly competitive hospitality sector. Ælement Fusion incorporates SALTO's stand-alone, battery powered electronic lock and technology, SVN data-on-card and advanced wireless technology with online, real-time capabilities — all without using wires.

JUSTIN MOBILE APP

The Justin Mobile app uses the latest in technology to communicate securely via the Cloud and enables hotel guests to receive their room key online, anytime and anywhere. The Justin Mobile app is completely secure as keys cannot be duplicated, unlike mechanical keys or some low-security RFID technologies. The encrypted data transfer uses SSL (Secure Socket Layer) AES 128-bit encryption opening procedures to ensure secure transmission.

Check-in:

New access rights given by system administrator.

OTA:

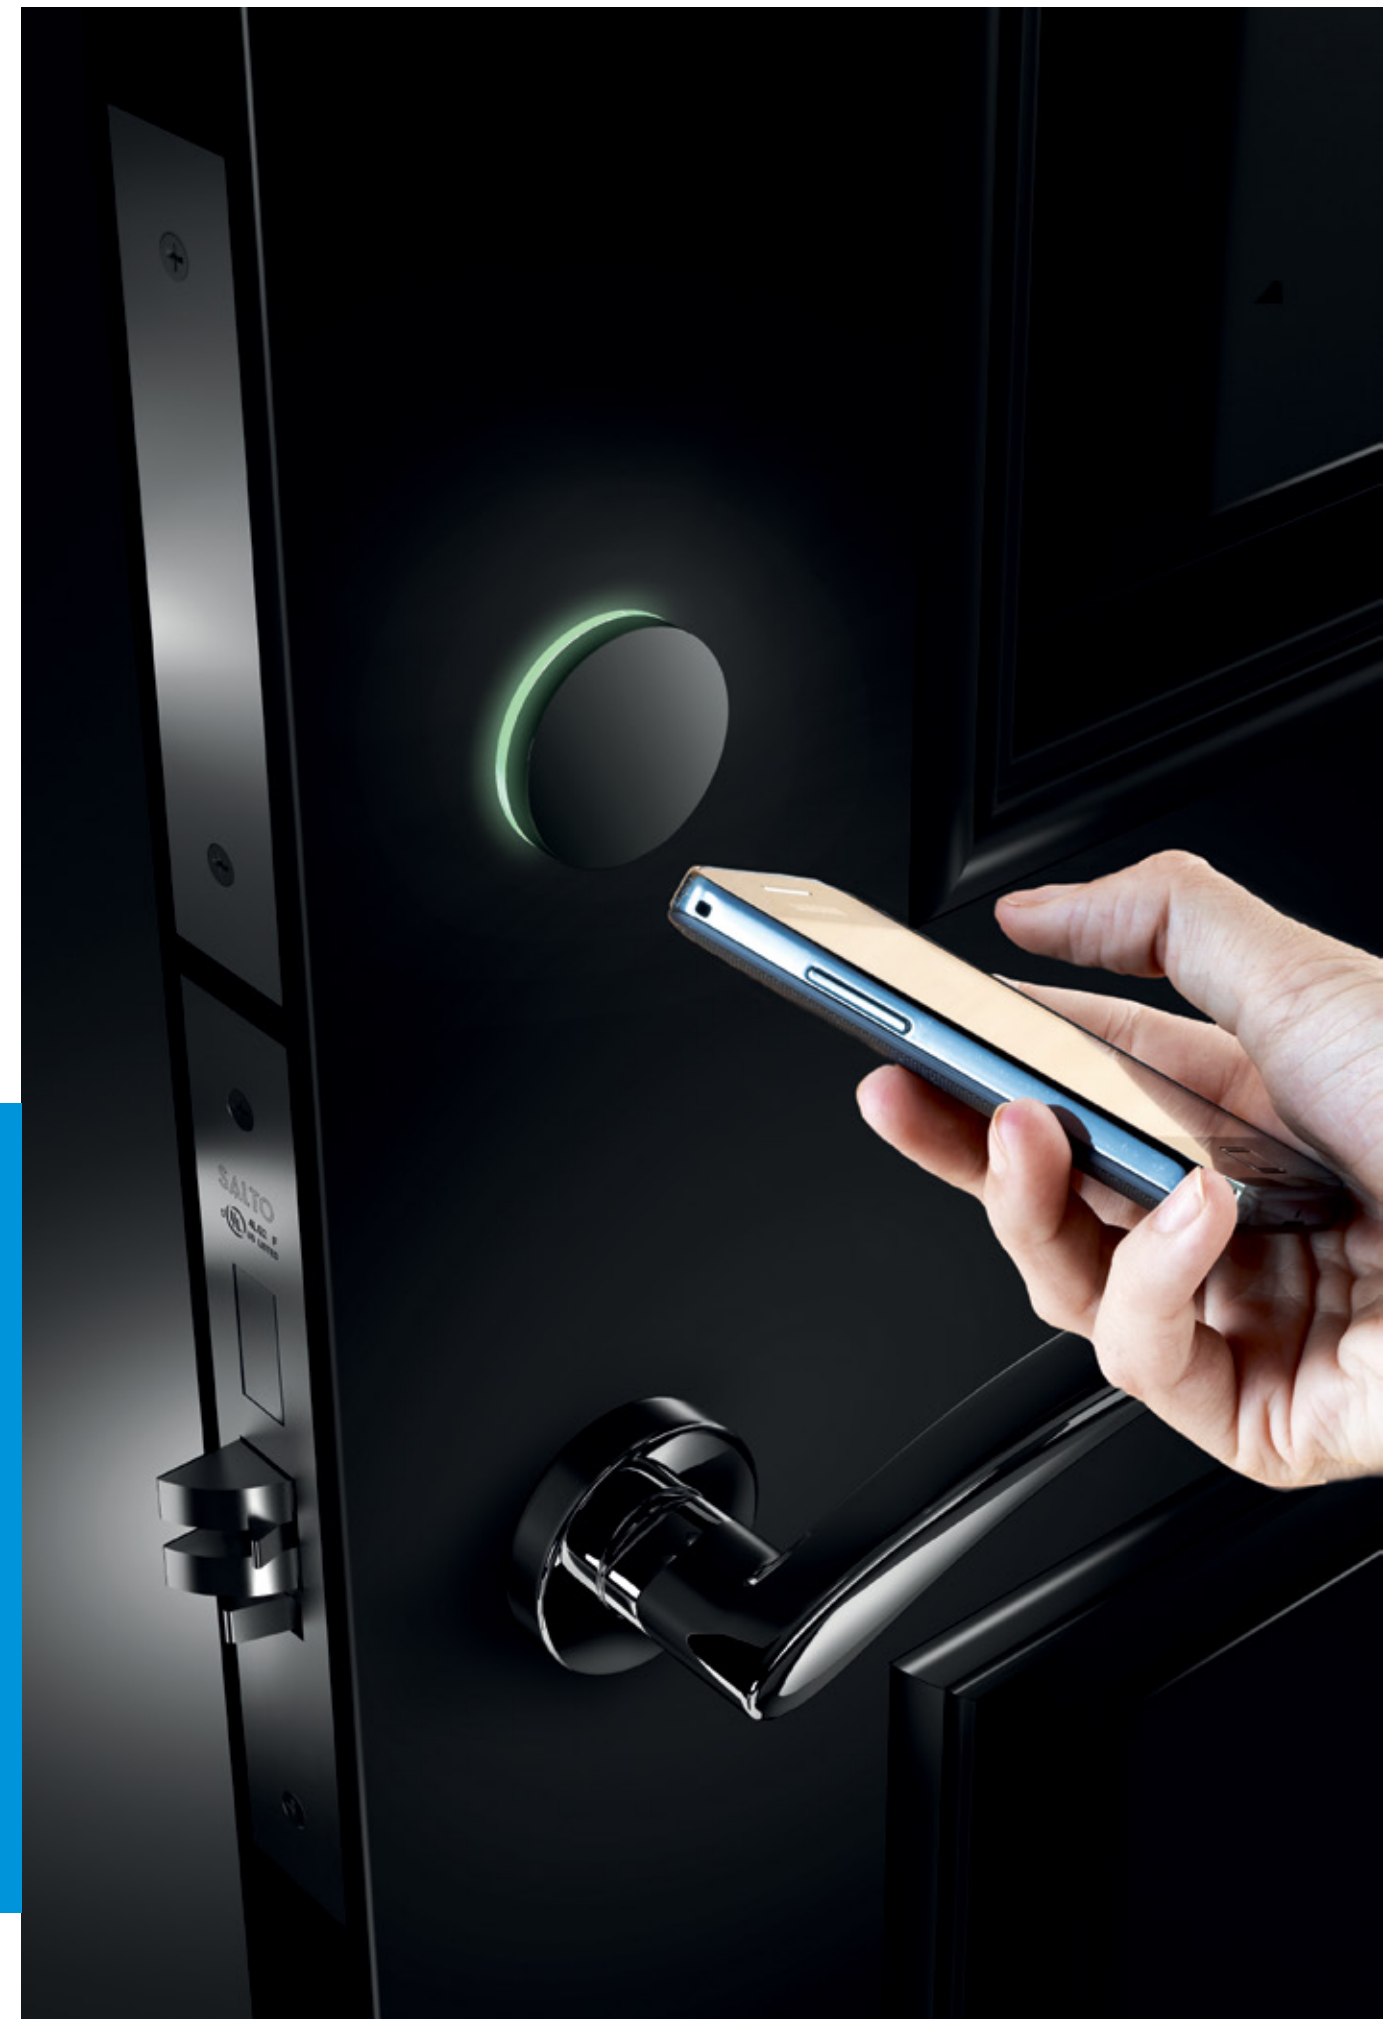

New rights sent OTA (Over The Air)

Justin Mobile APP:

Guests receive their keys online, anytime and anywhere at a registered and verified smartphone.

Guest Room Lock:

Guests select and open their room door, and automatically, the app sends confirmation that the door has been opened back to the front desk, even for doors equipped with offline electronic locks.

BUILD YOUR OWN DOOR

CUSTOMIZE YOUR ELECTRONIC HOTEL DOOR LOCK

Select an electronic hotel lock model, door type and customize your SALTO door lock with a range of colours, finishes and handle options.

This innovative tool will allow for complete visualization and customization of the locking solutions chosen by the user. By accessing the web page, the user is able to select the door lock model online to configure and create a customized door by personalizing everything.

SALTO Hospitality continues to innovate by launching a unique tool for the hospitality industry.

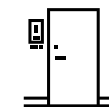

<https://mylock.saltosystems.com>

CHOOSE YOUR ELECTRONIC HOTEL LOCK MODEL:

Choose your favorite electronic hotel lock model (ANSI, Euro or Scandinavian standards) to create your customized door and personalise everything.

CHOOSE YOUR DOOR TYPE AND SELECT A HANDLE DESIGN:

Choose a door type, finish, handle design and lockset finish that match your guest room door.

DOWNLOAD AND SAVE YOUR SETTINGS:

Once the door configuration is complete, you can store and compare it against previously-configured door lock models or save it as a PDF.

CONTACT US:

Send us your selection, ask us a question or just contact us for a demo.

A hotel experience you need to discover.
